The Greek Chapter of ACM's Council on Women in Computing (Greek ACM-W) organizes the 7th Summit on Gender Equality in Computing. Despite the significant growth of Computer Science and Engineering and the exciting career prospects, there are still severe gender disparities in this field. The Workshop aims to bring together students, researchers and professionals in the field of Computer Science to (a) discuss and understand the reasons why there is gender disparity in individuals opting for Computer Science and Engineering, (b) celebrate and disseminate the achievements of computer professionals, women and men, in a fair and gender-equal way, (c) share experiences and stories, and (d) come up with incentives and measures to reduce gender inequalities in the field.

The Poster Session solicits posters from all areas of Computer Science and aims to offer the opportunity to **undergraduate, graduate and PhD students as well as young researchers and professionals** of any gender to engage with other researchers and professionals in the field, disseminate research work, receive comments, practice presentation skills, benefit from discussing ideas with other researchers. We also invite participants to submit their works as posters presenting the latest breakthroughs which have been developed in H2020, Horizon Europe, national, regional and international R&D projects. Submissions should present novel ideas, designs, techniques, systems, tools, evaluations, scientific investigations, methodologies, social issues or policy issues related to any area of computing. **Authors may submit original work or versions of previously published work**. Posters are ideal for presenting early stage research.
